A2

(Amended) The method of claim 2 wherein the maximum allowed vehicle deceleration is continuously variable.

56. (Amended) The method of claim 8 wherein the maximum allowed vehicle deceleration varies in a range between about 0.2 g and about 0.3 g.

9. (Amended) In an adaptive speed control system for a vehicle, a system for controlling vehicle deceleration, the system comprising:

a receiver for receiving an input signal indicative of a speed of the vehicle; and a controller for setting a maximum allowed vehicle deceleration based on the vehicle speed.

10. (Amended) The system of claim 9 wherein, to set the maximum allowed vehicle deceleration based on the vehicle speed, the controller is also for adjusting the maximum allowed vehicle deceleration in an inverse relationship to the vehicle speed.

9 M. (Amended) The system of claim wherein, to adjust the maximum allowed vehicle deceleration, the controller is also for decreasing the maximum allowed vehicle deceleration as the vehicle speed increases.

(Amended) The system of claim 10 wherein, to adjust the maximum allowed vehicle deceleration, the controller is also for increasing the maximum allowed vehicle deceleration as the vehicle speed decreases.

(Amended) The system of claim 10 wherein the maximum allowed vehicle deceleration is continuously variable.

12<sub>14</sub>. (Amended) The system of claim 13 wherein the maximum allowed vehicle deceleration varies in a range between about 0.2 g and about 0.3 g.
